

Dear Livestock and Seed Programs:

Please do NOT permit irradiated food to be served in the National School Lunch Program. Irradiated food has not been proven safe to eat. It degrades the nutritional content of food, and research has revealed a wide range of health problems in laboratory animals that ate irradiated food. In addition, it merely masks filthy and inhumane meat processing. Parents deserve the right-to-know what their children are eating, but irradiated food served in school cafeterias is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

*The nation's school children
should not be used as guinea
pigs. Their safety & health should
be top priorities.*

Sincerely,

*It is very upsetting to know how
you are going about shipping this
irradiated food to our children. I
haven't heard about it on any radio program!*

Sincerely,
